Dear BDO USA Hiring Team,

I am applying for the Identity Access Management Engineer role at BDO. Identity and access control is the center of my current job, and the posting reads like a description of work I already do.

At hear.com I administer identity for a 1,400+ person global company through Entra ID and Microsoft 365. I design and enforce IAM policy, run end-to-end provisioning and deprovisioning with audit-aligned access revocation, and conduct access control reviews that enforce least privilege. As the organization's Security Compliance Officer I own the HIPAA and PCI DSS programs, so I am used to validating that access matches policy, documenting standards and access guides, and working with compliance, legal and business stakeholders on exceptions.

I also automate where it helps. I have used PowerShell to bulk-update Active Directory proxyAddresses for user email aliases, and I keep the SOPs and onboarding frameworks that make these processes repeatable. I hold CompTIA Security+, Network+ and A+. I am based in Miami and available for the onsite and occasional on-call needs you describe.

Thank you for your time and consideration. I would welcome the chance to talk.
