Dear Greenberg Traurig, LLP Hiring Team,

I am applying for the Enterprise Systems Administrator role. I live in Miami and have spent five years administering Microsoft environments for a company that handles sensitive data, which is close to what a law firm needs.

At hear.com I administer Microsoft 365, Entra ID, Windows Server and Active Directory for 1,400+ employees. I manage endpoint security through Intune and Defender for Endpoint, review and triage security events in Microsoft Sentinel, and coordinate remediation with outside vendors. I configure access controls, enforce least privilege, and run periodic access reviews. As the organization's Security Compliance Officer I own HIPAA and PCI DSS programs, including audits, risk assessments and documentation, so strict confidentiality is routine for me. I also use PowerShell to automate repetitive administration.

I hold CompTIA Security+, Network+ and A+. I can work the hybrid schedule and am open to non-standard hours and an on-call rotation. I have used SCCM for domain-joined devices and now manage devices through Intune, so I can support both.

Thank you for your time and consideration. I would welcome the chance to talk.
